

(0006) Calaveras Foothills Fire Safe Council: Defensible Space Inspection Program

This group is already operating under an approved CWPP. Not only does their community include Communities at Risk, but also nearly 40 high residential density subdivisions. There are critical watershed areas in Calaveras County, which adjoin some forthcoming projects the CFFSC will be doing with Prop. 40 funding. The specific project for which funding is being requested from the SNC will supplement an existing volunteer program (which is suffering from dwindling participation) with trained contract staff who will conduct door to door defensible space inspections. Their goal is to inspect and bring a minimum of 4,200 homes into compliance with the state's defensible space regulations.
